Professional Summary

Data Analyst and aspiring Data Scientist with hands-on experience in Python, SQL, Power BI, Tableau, and Machine Learning. Experienced in data cleaning, exploratory data analysis, dashboard development, predictive modeling, and business intelligence. Completed a Data Science internship and developed analytics solutions across healthcare, retail, sports, and market intelligence domains. Strong academic performer with a CGPA of 9.40.

Skills

Programming & Querying: SQL, Python, Java

Data Analysis: Pandas, Numpy, Data Cleaning, EDA, Statistical Analysis

Machine Learning: Regression, Classification, Model Evaluation, Predictive Analytics

Visualization: Power BI, Tableau, Advanced Excel, Matplotlib, Seaborn.

Tools: Git, GitHub, Jupyter Notebook, VS Code

Experience

Data Science Intern

Jan 2025 – April 2025

Dataview Analytics (Remote)

Tools Used: Excel, SQL, Power BI

- Analyzed and cleaned transaction datasets using Python, SQL, and Excel to support Credit Card Fraud Detection analysis.
- Performed data validation and exploratory data analysis (EDA) to identify fraud patterns, anomalies, and trends.
- Created interactive Power BI dashboards and reports to visualize fraud indicators and key performance metrics.
- Automated data processing and reporting tasks, improving workflow efficiency and reducing manual effort.

Projects

COVID-19 Trend Analysis and Prediction | *Python, Machine Learning*

Mar 2026 – Apr 2026

- Analyzed COVID-19 datasets to study infection trends, recovery rates, and regional case distributions.
- Performed data cleaning, preprocessing, and exploratory data analysis (EDA) using Pandas, NumPy, and Matplotlib.
- Built machine learning models to forecast future COVID-19 case trends using historical data and evaluated performance using regression metrics.
- Developed visualizations and analytical reports to identify patterns and support data-driven decision-making.

Women Cricket Team Performance Analysis | *Power BI, Excel*

May 2026 – Jun 2026

- Developed an interactive Power BI dashboard to analyze player performance, batting statistics, strike rates, and team comparisons.
- Designed KPI cards, slicers, filters, and drill-through reports to enhance dashboard usability and data exploration.
- Performed data cleaning and transformation using Power Query to ensure data accuracy and consistency.
- Generated insights to identify top-performing players, match trends, and key performance indicators.

Live Book Market Analysis & Recommendation System | *Python, Pandas*

Feb 2026 – Mar 2026

- Analyzed book market datasets to identify customer preferences, genre popularity, and rating patterns.
- Performed data preprocessing, feature engineering, and exploratory data analysis using Python and Pandas.
- Developed a recommendation system to suggest books based on user ratings and similarity analysis.
- Created visual reports and dashboards to uncover market trends and support recommendation-driven insights.

Awards & Certifications

- **Data Science with AI – ITVedant (2026)** — Python, SQL, Machine Learning, Power BI, Tableau
- **Deloitte Data Analytics Job Simulation (2026)** — Data analysis, dashboard development, and business insights
- **SQL HackerRank Certification (2025)** — SQL queries, joins, subqueries, and database concepts

Education

B.E Information Technology

Savitribai Phule University, Pune

Pursuing

CGPA: 9.40 / 10
