PROFESSIONAL SUMMARY

Data Analyst with hands-on experience in SQL, Python, Power BI, and Tableau, skilled in database design, complex queries, data cleaning, exploratory data analysis, and dashboard development. Experienced in translating raw data into clear, actionable business insights, with additional exposure to machine learning and predictive modeling. Completed a Data Science internship focused on transaction data analysis and built end-to-end analytics solutions across transportation, sports, and healthcare domains. Consistent academic performer with a CGPA of 8.29/10.

SKILLS

Programming & Querying: SQL (Joins, Subqueries, Schema Design), Python

Data Analysis: Pandas, NumPy, Data Cleaning, EDA, Statistical Analysis

Visualization & BI: Power BI, Tableau, Advanced Excel, Matplotlib, Seaborn

Machine Learning: Regression, Classification, Model Evaluation, Predictive Analytics

Tools: Git, GitHub, Jupyter Notebook, VS Code, MySQL

EXPERIENCE

Btechnos (Remote)

Jan 2025 – Apr 2025

Data Science Intern

- Cleaned and analyzed transaction datasets using Python, SQL, and Excel to support a credit card fraud detection initiative.
- Performed data validation and exploratory data analysis (EDA) to identify fraud patterns, anomalies, and trends.
- Built interactive Power BI dashboards and reports to visualize fraud indicators and key performance metrics.
- Automated recurring data processing and reporting tasks, improving workflow efficiency and reducing manual effort.

PROJECTS

Cab Booking Management & Analysis System | *MySQL*

Sep 2025 – Oct 2025

- Designed a relational database schema in MySQL to store and manage large-scale cab booking data across customers, drivers, and trips.
- Wrote SQL queries using joins, subqueries, and aggregations to monitor ongoing and completed bookings.
- Analyzed customer and driver behavior patterns to support data-driven decision-making.
- Evaluated driver performance and studied revenue trends to identify opportunities for improving overall system efficiency.

COVID-19 Trend Analysis and Prediction | *Python, Machine Learning*

Mar 2026 – Apr 2026

- Analyzed COVID-19 datasets to study infection trends, recovery rates, and regional case distributions.
- Performed data cleaning, preprocessing, and EDA using Pandas, NumPy, and Matplotlib.
- Built machine learning models to forecast future case trends from historical data, evaluated using regression metrics.
- Developed visualizations and analytical reports to surface patterns and support data-driven decisions.

Women's Cricket Team Performance Analysis | *Power BI, Excel*

May 2026 – Jun 2026

- Built an interactive Power BI dashboard analyzing player performance, batting statistics, strike rates, and team comparisons.
- Designed KPI cards, slicers, filters, and drill-through reports to enhance usability and data exploration.
- Cleaned and transformed data using Power Query to ensure accuracy and consistency.
- Generated insights on top-performing players, match trends, and key performance indicators.

AWARDS & CERTIFICATIONS

Data Science with AI – ITVedant (2026) — Python, SQL, Machine Learning, Power BI, Tableau

Deloitte Data Analytics Job Simulation (2026) — Data analysis, dashboard development, and business insights

SQL (HackerRank Certification) (2025) — SQL queries, joins, subqueries, and database concepts

EDUCATION

Savitribai Phule Pune University

B.E. in Information Technology

Pune, India

CGPA: 8.29 / 10 | Graduated: June 2026
